Abstract:

If the mass murder of disabled people has not been taken as the immediate antecedent of nazi holocaust, it is because, except rare exceptions, the hegemonic character of eugenics during the precious years of nazi regime has not been considered. Academy has considered it as a pseudo-science or a “bad idea”, so its effects have been subsumed. We'll try to overcome eugenics forgetfulness in universities research and teaching.

Keywords: Disability, Eugenics, Holocaust, Human Disqualification.
