

***Disabled people recognition:
The possibility of access to cultural goods***

Abstract:

Currently, there is not offered to people with disabilities equal opportunities for a real integration and participation in their community development. This work is an empirical-conceptual one that tries to analyse how is the real recognition of people with disabilities at an institutional level. Our intention is open ways to ask what is possible to do in order to modify practices and attitudes that cause margination and stigmatization.

Keywords: Disability, Equal Opportunities, Cultural Goods, Social Practices and Attitudes, Stigmatization.
